

I²IT's Academic Team

The state-of-the-art infrastructure of I²IT is backed by a distinguished and efficient Faculty comprising of highly qualified academicians and industry experienced professionals. Each Faculty member establishes a unique style of imparting knowledge, which not only helps the students assimilate what is being taught, but also develops in them the insatiable thirst to learn more and to experiment.

The Faculty understands that the need today is for a new and revolutionary method of teaching, which involves more of a hands-on application as opposed to the conventional classroom methods.

Lectures are characterized by an interactive exchange of knowledge where the student does not just sit and imbibe information. The Faculty strives to open your mind to the various possibilities and expand your horizons

so that you can fully realize your potential.

Faculty members stay up-to-date with the latest happenings and trends in the industry and make sure the students do too. Projects and assignments are always based on real-life scenarios with rigorous 'real-life' like deadlines. Faculty members drive I²IT's ethos and train you to become one of the leaders and innovators of tomorrow.
