Advanced Certificate Programme in Software and Computing Technologies (ACP-SCT)
9-Months, Full-time

Today, India has emerged as the Information and Communication Technology (ICT) superpower, thanks to the Govt. of India for their continuous effort. The Industry body, NASSCOM says, "India's software export raises up to 16% -18% in the financial year 2011-2012 and the demand for software outsourcing services remains strong in Western clients". Most importantly, India has now become the world's R&D (Research & Development) hub attracting world leaders like IBM, Microsoft, Google, Yahoo, Cisco, Ericsson, Intel, Motorola, Analog services, Samsung, LG, Sony and others who have set up large R&D centres in India for developing future generation technology products and services. The demand for Information Systems (IS), Information Technology (IT), Software Training, and R&D have been growing. Therefore, employment opportunities are plenty. Advanced technologies like Business Intelligence, Data mining, Web services, Cloud Computing, Big data, etc are in the forefront. Adequate skilled human resource is highly desired for advanced IS development. Apart from traditional IT training, one should acquire knowledge in advanced technologies to meet the requirements of new generation system development. The objective of the Advanced Certificate Programme in Software and Computing Technologies (ACP-SCT) is to nurture competent and productive professionals to meet the new generation system development of ICT industry.

DEPARTMENT OF INFORMATION AND COMMUNICATION TECHNOLOGY

Advanced Certificate Programme in Software and Computing Technologies (ACP-SCT) 6-Months, Full-time

Foreword

India has emerged as the Information and Communication Technology (ICT) superpower for future generation technology products and services. India's former President Dr.A.P.J.Abdul Kalam has mentioned 5 key areas (Agriculture & food processing, Infrastructure with reliable electric power, Education & Healthcare, Information Communication Technology and Critical technologies & strategic industries) for the development of the country in the vision 2020 document (TIFAC). ICT was one among them. The current emerging, dynamic and competitive environment has raised the necessity for improved technological support for achieving the vision 2020 goal. To keep pace with the dynamic nature of the advanced technologies, advanced training and sophisticated infrastructural support is becoming compulsory to create skilled human resources for the development of the Nation. The increased demand for Information Systems, Information Technology, Software Training, and Research & Development have been steadily growing. The objective of the Advanced Certificate Programme in Software and Computing Technologies is to nurture competent and productive professionals to meet the new generation system development of the ICT industry.
